

ANAFRA NEXTCLOUD

SECURE CORPORATE
CLOUD STORAGE

Nextcloud

ANAFRA Nextcloud provides you with secure file storage and sharing among team members. **The data is synchronized exclusively to our servers**, which are managed by our system administrators, who will be happy to help you in any situation. We will ensure the availability of current data on all commonly used devices. ANAFRA Nextcloud will grow with you without disproportionately increasing the price, the number of users does not have a direct effect on the price.

What are the benefits of ANAFRA Nextcloud?

- Automatic data versioning – allows you to **revert to older versions of files**.
- **Full technical support from ANAFRA administrators**.
- **Secure data sharing** - within the work team, at the home office and with customers outside the organization.
- Easy data recovery and transfer - in the event of a desktop, laptop, tablet or mobile phone crash, **data recovery is very simple**; on a new device, you continue your work in a few minutes.
- Automatic backup - you don't have to deal with where and how often to back up data, we will do it for you **every day**; to **two geographically different locations**.
- **User permissions and roles** - the ability to define custom roles allows easy management of users, while each user / role can have defined access only to specific files or folders.
- **Acceptable service costs with an increasing number of users** - most competing services are becoming very expensive with 3 or more users.
- **Data is synchronized exclusively to our servers** - no one but you will have access to your data or contacts.

What do customers appreciate most about Nextcloud?

- The service is provided solely and exclusively on our own redundant infrastructure.
- Pays only for space, not for the number of users.
- Full technical support from ANAFRA administrators. He always knows who to call.
- Unlimited number of users with the possibility of defining roles and quotas.
- Advanced file sharing internally and to clients; the possibility of time-limited password-protected sharing.
- Easy transition to home office.
- Free migration of ANAFRA Nextcloud data and settings within the service.
- Guarantee of data storage on servers located only in the Czech Republic.
- Intuitive operation and very easy administration.
- Synchronize files between different devices and operating systems.
- Compatibility with all platforms - Windows, macOS, Linux, Android and iOS.
- Possibility to work offline.
- Czech, English, Slovak, Polish and Russian language versions.
- Data security, advanced encryption.
- Data is backed up to a different location every day.
- GDPR ready.

> How much does ANAFRA Nextcloud cost?

Pricing is based on the volume of data used, not the number of users, which is unique in corporate solutions on the market.

It is also a secure business service, where there are, of course, higher costs for data security, backup and support.
