Overview – Marshfield, WI

Aventus Data Centers has made an offer to purchase a data center in Marshfield, Wisconsin. Aventus is committed to placing data centers with world class features in smaller or rural communities and using these data centers to enable positive growth and employment for these communities.

Hyper-Personalized Services

Each Aventus Customer is amazingly unique, with unique leaders, market positions, assets and capabilities. One size does not fit all so Aventus is not your average data center company. In addition to the normal data center benefits, we are experts at:

- Knowing the leading edge, not bleeding edge, technical products/services being made available;
- Bringing the best of breed vendors for those products/services into our data centers;
- Helping Customers plan next generation systems using a select set of these products/services; and
- Providing services to implement a unique next generation IT system for each Customer.
