Enabling business agility
## through **IT** agility

Continuously changing market conditions, disruptive technologies, regulatory enhancements, utility shortfalls, and consumer empowerment are some of the pressures placed on business environments today. Despite all of these challenges, businesses are expected to deliver improved responsiveness whilst remaining at the competitive edge.

Now, more than ever before, IT strategies need to be aligned to business strategies.

With infrastructure and technology being the primary drivers of IT Agility, reliability, performance, quality of service, scalability and mobility are key elements requiring focus.

Business Connexion's Data Centre Services has market leading expertise to deliver a comprehensive range of services, to support Cloud Computing, Big Data, Mobile and Collaboration services demanded by highly dynamic business environments.
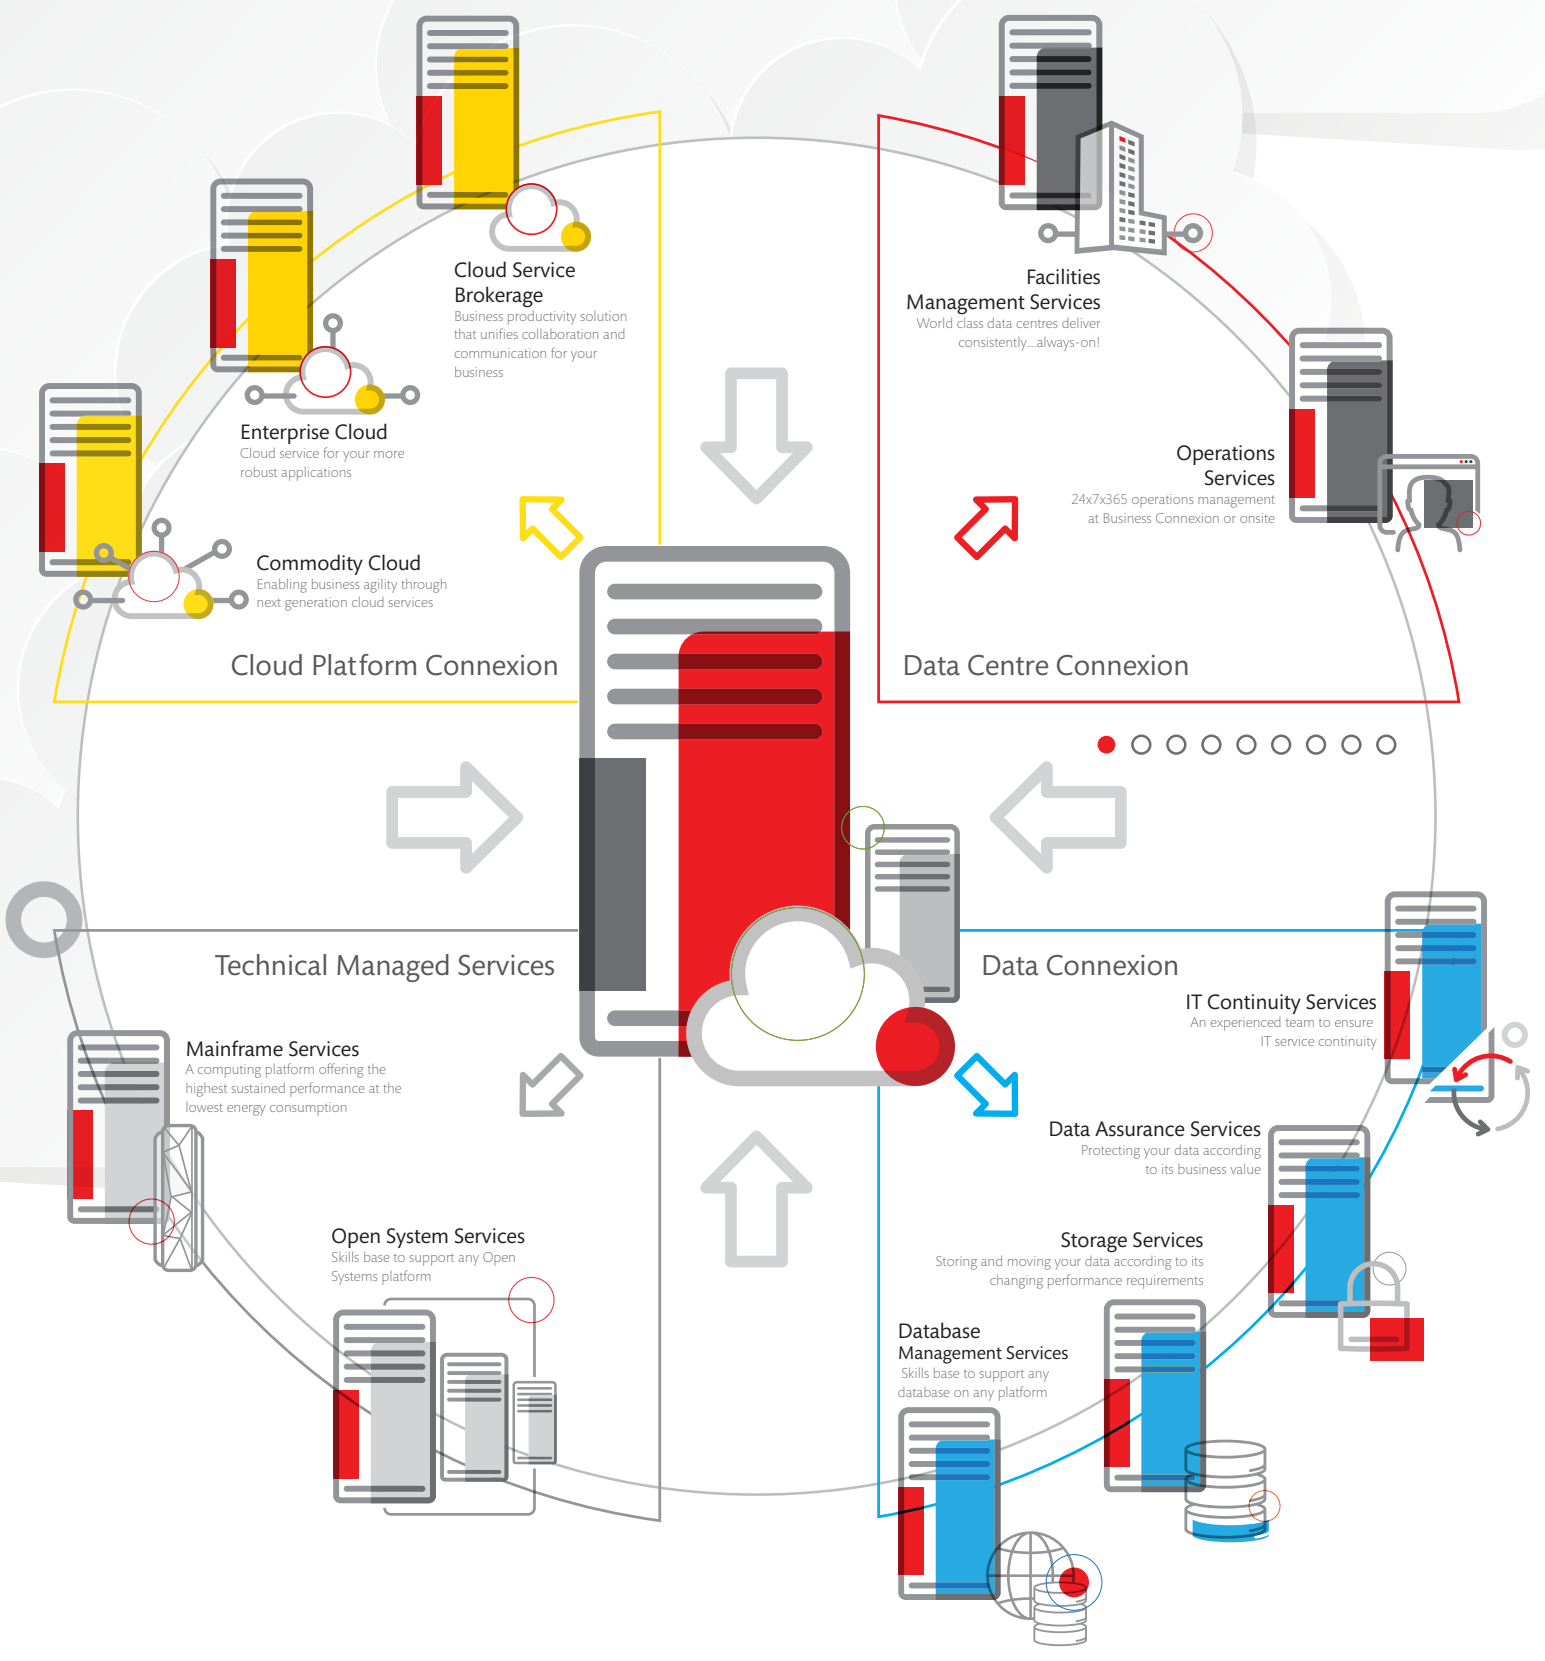

ACCELERATE YOUR TIME TO VALUE
WHAT DO DATA CENTRE SERVICES OFFER YOU?

Having a unique always-on Data Centre capability, places Business Connexion at the forefront of service reliability. With the largest number of qualified and certified data centre specialists, we are now in our third decade of zero client downtime.

Self-service enables our clients to orchestrate their Cloud environments across a selection of private, public and hybrid deployment models. Heavy-duty mission-critical applications are expertly processed on our Mainframe & Open Systems platforms, with data management catering for the full data life cycle stages, ranging from database, storage, data assurance, archival to disaster recovery.

All Data Centre Services are underpinned by ITIL V3 processes, where Business Connexion enjoys the highest maturity rating in Africa.

Skills base to support any database on any platform

BENEFITS AT A GLANCE

FLEXIBILITY

No two businesses are the same in the way they prefer to consume services. However, all companies want to capitalise on new business opportunities, where a fast time-to-market and profitability state is paramount. Taking this into consideration the Data Centre Services offer a host of service types to meet your exacting needs, ranging from onsite support to a fully-provisioned managed service.
RELIABILITY

Guaranteed always-on uninterrupted ICT facilities provide a strong foundation for the provision of world-class reliable services. Thriving businesses can ill-afford any service outages as financial impacts can have irreparable damages on their business. Having the ability to execute a comprehensive range of IT Services, backed by a highly-trained technical team with a wealth of experience across all platforms, enables Business Connexion to meet increasingly complex client requirements.
COST-EFFECTIVE

Uncertain economic times coupled with competition from overseas service providers, are placing enormous pressure upon services pricing. Competitively priced solutions are key to a successful and sustainable business model. Business Connexion is mindful of these challenges, so every effort has been made to develop services that can enable you to align your IT spend to that of your business consumption requirements.
WHY CHOOSE BUSINESS CONNEXION?

We have over 33 years of experience as a leading ICT outsourcer. We have more Data Centre capacity than any other service provider in South Africa.
