Partner/Channel Program

Our newly constructed datacenter is state of the art and built to Tier-3 standards. The facility is a below-grade hardened bunker designed to offer maximum security and system availability. We offer solutions to fit a wide variety of tailored mission profiles including virtual server hosting, data storage, cloud models, Disaster Recovery and Business Continuity, and a full suite of technology support services. Our datacenter anchors our business continuity campus, which provides a turnkey office setting to allow clients to continue operations in the event of a severe business interruption. We offer premium service solutions optimized to client needs, yet flexible enough to move with changing business conditions.

- Underground Bunker
- Built to Tier III Standards
- Fully Redundant
- Managed Services Available
- High Availability
- Secure Practices
- Regulatory Compliance
- Smart Hands

Business. Technology. Solutions.
