ColoSpace Data Center
WALTHAM, MA

ColoSpace's Waltham, MA Data Center is located on Winter Street in the heart of the Route 128 tech corridor, and is an ideal location for the deployment of production and development site applications. The Waltham site is engineered with advanced electrical and cooling equipment to support dense server and storage environments and is directly connected to multiple fiber optic networks for high speed access to the internet and private telecommunications networks. The site is equipped with emergency backup power supplies and multiple tier one internet connections to ensure long-term performance and reliability.
