carriers, IX's & ISP's

Flexibility

208 MW
total power capacity

Green Energy

Equivalent of 100% produced from
Renewable Energy sources

DATA4!
SMART DATACENTERS
AT SCALE

DATA4 is an European data center specialist which currently operates 15 data centers in **Paris, Milan, Luxembourg** and **Madrid**. The company finances, designs, builds and operates data centers with a construction rate of one building every 9 months.

These infrastructures are based on **high-quality design** and a rich and **scalable portfolio of services**, which perfectly **adapts to the needs of customers** (from a simple rack in colocation to a dedicated building).

The group offers **carrier and cloud neutral datacenter solutions** thanks to its **Digital Hub**, a service platform designed to facilitate the development of hybrid IT (combining private and public Clouds) for its customers. The platform enables companies to connect with Cloud and Internet ecosystems on a global scale.

DATA4's customers include Cloud providers, digital service firms and large and medium-sized companies. The group currently owns **123 hectares** and a power reserve of **208 MW** to enable continued expansion to meet the growing needs of its customers.

We address a very demanding and dynamic market. DATA4 has the resources needed to support and fulfil our customer's requirements – Cloud Service Providers, Independent Software Vendors, System Integrators and Businesses in particular – as they constantly seek next-gen and hyper-connected infrastructures providing scalable and intelligent data hosting and IT solutions.

Olivier Micheli, CEO DATA4 Group

D4 SMART DC

A DCIM 2.0 TAILOR-MADE FOR YOUR INFRASTRUCTURE

Visibility   **Management**   **Performance**   **Agility**

The **D4 Smart Datacenter** is a unique integrated solution to deliver full agility in the data center management. **D4 Smart Datacenter** provides an infrastructure that is highly transparent, manageable and agile. Using this solution, your business will benefit from: **risk reduction**, **performance**, **infrastructure management**, **compliance** & **CSR**.
