City Campus

Oliver's Yard Data Centre

Oliver's Yard is a colocation site that is part of the **London City Campus** alongside the **Hanbury Street Data Centre**.

Located in the heart of London's high-tech Silicon Roundabout area, Oliver's Yard offers a highly connected colocation site within easy access of East London's Tech City and the City of London.

Conveniently situated in a discreet building, Oliver's Yard attracts a high population of financial services, digital media, internet exchanges, carriers ITSPs and MSPs.

- Colocation in Cabinets, Cages and Private Rooms
- Connectivity to 195+ networks, carriers and internet exchanges, including LINX and LONAP.
- Access to all public and private cloud providers.
- Rapidly installed Cross Connects within and between data centres across London.
- Accessible East London, Zone 1 location.

London Metro Connectivity

Oliver's Yard is an interconnected part of the **London Metro** which connects eight of Digital Realty's colocation sites across the London Metropolitan area, enabling reliable connectivity direct to your partners, suppliers and other Digital Realty customers. Connect to other City data centres, as well as to The Docklands and West London to secure access to networks, cloud on-ramps and geographically diverse options for back-up and disaster recovery.

Unlock your global IT strategy from London

Our global infrastructure solution, **PlatformDIGITAL®** enables businesses to interconnect global workflows from anywhere in the world, fulfilling their connectivity needs quickly and efficiently. With access to over 700 connectivity providers, key hyperscale public clouds, local cloud providers, network density and interconnection services customers are able to deploy their IT infrastructure in the buildings and locations of their choice. All benefit from 99.999% uptime, implementation and service consistency across the world and the highest level of physical and network security.
