Los Angeles IBX® Data Center

Los Angeles Data Centers

Equinix is the world's digital infrastructure company™. Digital leaders harness our trusted platform to bring together and interconnect the foundational infrastructure that powers their success. Our Los Angeles data centers are business hubs for 345+ companies. Our L.A. customers can choose from a broad range of network services from 75+ providers. They can also interconnect directly to customers and partners in their digital supply chain. Our L.A. customers can now connect to Amazon Web Services (AWS) Direct Connect cloud service from any of our L.A. data centers.

With the expanding use of video on internet and mobile platforms, our Los Angeles colocation facilities are an integral part of the Equinix Media Cloud Ecosystem for Entertainment™ (EMCEE™)—the next-generation reference model for optimizing content creation, global distribution and services across the media and entertainment industry.

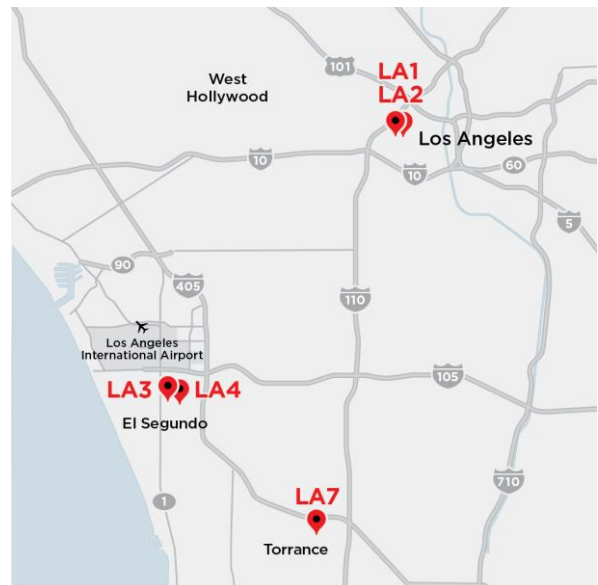

Our customers here also include managed hosting services, social media platforms and online retail services. This unique mix of networks, ISPs and content companies makes our Los Angeles colocation facilities the ideal places for customers to connect with their business partners.

Equinix Los Angeles Data Centers Benefits

- Dense concentrations of content delivery networks, entertainment companies and managed hosting services
- Strong network and interconnection base helps decrease latency, improving performance and reliability of content delivery
- Strong content and digital media ecosystem
- Broad range of choices for network, cloud and IT service partners
- Access to the second-largest peering exchange in L.A.

Building

Space	
Colocation Space	60,719 ft ² (5,641 m ²)
Building Type	7-story, multitenant, steel and concrete
Parking	Adjacent to building (no fee)
Floor Type	
Floor Load Capacity	100 psf (4.79 kN/m ²)
Seismic Rating	
Seismic Design Category	4
Fire Protection	
Fire Suppression	Double-interlocked, pre-action (dry pipe) deployed in two-zone configuration

Facilities

Power and Cooling	
Cabinet Density	2.4 – 3.0 kVA per cabinet
Power Distribution	120V/208V
Utility Feeders	3
UPS Configuration	Distributed redundant
UPS Redundancy	N+1
Standby Power Configuration	5 x 1,500 kW diesel generators
Standby Power Redundancy	N+1
Cooling Configuration	Central plant with air-cooled chillers, chilled water pumps, air handling units
Cooling Redundancy	N+1
Security	
Physical	Man trap entry
Human	24/7 on-site security officers
Electronic	Biometric readers, fiber vault, CCTV surveillance with 90-day video retention, motion detection

Amenities

- Break Room
- Loaner Tools
- Showers
