H5 Cleveland: Ideal for Enterprise and Cloud Service Providers Mission-Critical Deployments

The Cleveland Technology Center is a Tier III data center that also happens to be the most interconnected building in Ohio. Totaling more than 330,000 square feet, the data center serves a large government entity, Fortune 500 customers and leading cloud service providers.

H5 Cleveland provides one of the lowest TCOs in the Eastern United States. Reliable power is less than $0.06/kWh and the building uniquely qualifies for 100% sales and use tax abatement on data center equipment with the State of Ohio.
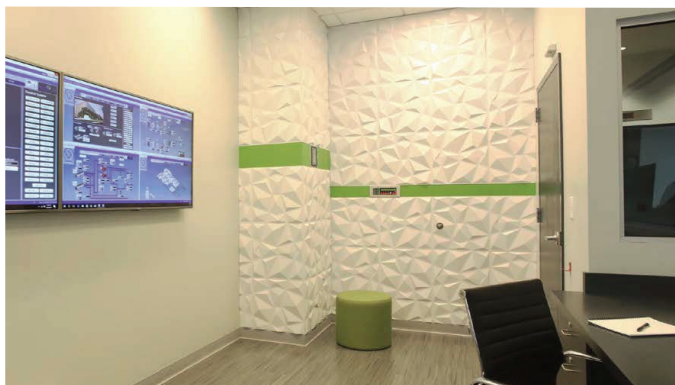

Tier III Data Center

-24x7 security and operations staffing
-Certified Tier III data center design and operation
 (TIA 942 compliance)
-SSAE-16 Type II SOC II certified

H5 DATA CENTERS
