H5 Quincy: Lowest-TCO Wholesale Data Center in U.S.

H5's 240,000 SF / 40 MW Quincy data center is located on a 63-acre campus at 1711 M Street. The facility has expansion capacity up to 480,000 SF.

Lowest Cost of Power in the US, Tax Incentives

Customers at H5 Quincy pay an average annual rate of \$0.03 per kilowatt hour, the lowest cost of power in the US. This adds up to millions in savings when compared to higher-priced markets. Quincy also offers lucrative tax incentives - 100% Washington state sales and use tax abatement on data center equipment.

Go Green: Abundant Access to Sustainable Energy

Offset the environmental impact of wholesale power consumption with 100% renewable, reliable hydro power from Grant County PUD.

Diverse Data Center & Colocation Offering

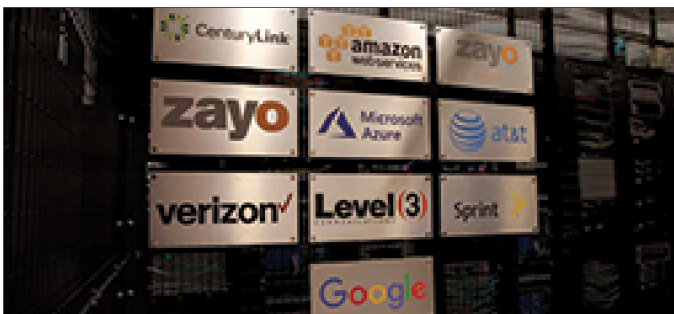

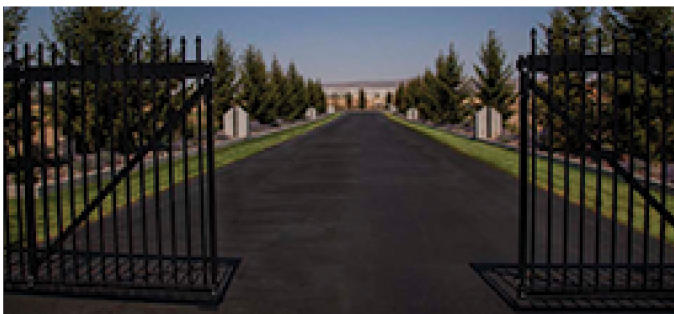

H5 Quincy offers a range of solutions including powered shells, private suites, secure cages and other colocation services.
