

HIPAA Compliant Hosting

SECURE | HYBRID | COMPUTING

HIPAA HOSTING SOLUTIONS

OnRamp offers the most comprehensive HIPAA solutions on the market. Our processes and services dive far more deeply into ensuring compliance with HIPAA than most other data centers or hosting providers.

| | |
|------------------------------------|---|
| Risk Analysis | 3-step Risk Management Tool developed by our HIPAA compliance experts to ensure the confidentiality, availability, and integrity of your ePHI. |
| Network Firewall | Best-in-class firewalls to protect your network perimeter and keep unauthorized traffic from entering. |
| VPN Tunnels | FIPS 140-2 compliant VPN tunnels to encrypt traffic and provide secure remote access to your OnRamp hosted infrastructure. |
| Encrypted Storage | Industry-leading AES 256-bit full-disk SAN encryption to protect your sensitive data at rest without sacrificing performance. |
| Encrypted Backups | Secure and compliant backup and recovery services to protect mission-critical applications against costly data loss. |
| Malware Protection | Centralized anti-virus/anti-malware software to detect and remove malware and safeguard sensitive data from malicious activity. |
| File Integrity Monitoring | Continuous monitoring of files, folders, and registry keys to detect and alert on unexpected changes and ensure data integrity. |
| Log Management | Automated log collection and analysis to facilitate the rapid identification of critical security events and the regular review of system activity. |
| Intrusion Detection and Prevention | Real-time monitoring of network traffic to detect malicious activity and prevent security threats from causing harm to your network. |
| Web Application Firewall | Application-layer defense to protect web-facing applications against targeted threats, including SQL injection, XSS, and zero-day attacks. |
| Two Factor Authentication | Two independent authentication factors to validate remote users and prevent unauthorized access. |
| Vulnerability Scanning | In-depth inspections of computer systems and applications to identify security weaknesses and vulnerabilities that could be exploited. |

Every HIPAA Solution Includes

- 100% uptime guarantee and SLA
- Dedicated team of HIPAA experts
- 24/7/365 Full Hybrid Support
- Signed business associate agreement
- Enterprise class hardware/software
- Auditable infrastructure

HIPAA COMPLIANT HOSTING

OnRamp's HIPAA experts work closely with each customer to design and implement systems and applications to meet HIPAA's privacy and security standards. Working with OnRamp, you have a trusted partner in ensuring that your IT infrastructure is HIPAA compliant.

"Our team felt very strongly about the decision to go with OnRamp, largely due to the security and privacy protocols they built around their HIPAA compliant hosting offerings."
