# ABOUT LIGHTSPEED

BUILT BY GEEKS, FOR GEEKS

“ ”

*We provide our customers lightning  
fast service, with a smile, on top of  
rock-solid infrastructure*

**Joshua Holmes**  
CEO

**LightSpeed Hosting** Founded in Medina Ohio; we sit on top of a fiber-rich tech corridor between Cleveland and Akron Ohio. Ohio's mild weather, wide range of inexpensive interconnectivity, and ample cheap power make it a great location for a data

center. Our company prides itself on providing the best customer support in the business, on top of reliable infrastructure to give you rock-solid uptime. Helping customers with big or small problems, we just love helping others succeed.

**CALL TODAY** ( 8 8 8 ) 9 2 9 - 9 6 3 9

# LIGHT SPEED

“ ”

*We combine the stability of a big-name hosting company, with the hands-on support of a mom-and-pop shop.*

**Jason Ables**  
CSO

In addition to helping run the back-end for other firms, we also noticed a huge gap in host solution providers. While there were plenty of hosting providers in the market, very few had state-of-the-art systems, and few knew how to handle rapid scale growth in their web infrastructure. Some of the customers we

manage are utilizing 50-100 servers just to serve up their UI cache for their site; with these kinds of customers, you get exposed to problems that other providers simply do not have solutions for.

In 2016, we opened up our first fully-owned data center facility located in Medina, Ohio. This

situates us smack dab between Akron and Cleveland, but outside of the hectic city drive, and on a much more stable electric grid. This facility also allowed us to setup more services that we've never been able to offer before on the Medina County Fiber Network.

# CLOUD HOSTING

HIGHSPEED, REDUNDANT, SECURE

“ ”

*LightSpeed has helped me scale our  
telehealth startup from concept to  
a national reach.*

**Leslie Schover**  
MD Anderson

## CLOUD HOSTING

Our clients range from small mom-and-pop businesses to multi-national clients that require industry leading security and uptime. We have a large presence in the higher-education space as well as healthcare and health-tech.

Our infrastructure is built with redundancy in mind. Our host servers all have dual 10GB fiber cards as well as RAID for the hypervisor and triple-redundant SAN for block storage.

We also offer a range of GPU based offerings for customers that require heavy lifting for rendering or remote desktop environments.

### Highly Secure

Industry-leading security.  
Need SOC or HIPAA hosting?  
We have you covered.

### Blazing Fast

Our entire infrastructure was  
built with blazing fast fiber, SSD  
storage and beefy servers.

### Super Redundant

Redundant everything.  
Cooling, fiber, power, and  
storage. Our setup creates  
blazing fast speeds with  
rock solid uptime.

### Stellar Support

Don't want to manage the  
server yourself, or just need a  
hand once in a while? There's  
always a senior system  
admin waiting to help.

RELIABLE, REDUNDANT, SECURE

“ ”

*We looked at other data centers but couldn't make it work financially. LightSpeed has allowed us to affordably move to a real data center.*

**Tim Smith**  
Medina County

## ENTERPRISE COLOCATION

LightSpeed allows everything from 1U to full racks. Once your gear is here, it's protected by our state-of-the-art biometric security system and HD surveillance 24/7. Our customers can choose from our mixed bandwidth offering or directly connect to 10+ major Tier 1 Internet carriers.

We can offer locking rack doors all the way down to a quarter rack and, as always, offer our rock solid managed support for those customers that need remote hands.

**ENTERPRISE COLOCATION**

INTERNET SERVICE

### Highly Secure

24/7 HD video surveillance, two layers of biometric security and combination locks on racks.

### Flexible

Need a whole rack, or just a single U, we've got you covered.

### Hybrid Solutions

We can mix our rock solid cloud infrastructure with your colocated environment and help you grow.

### Managed Services

Let us manage your gear for you. Our support staff can save you time and money so you can focus on your business.

ULTRA HIGH SPEED RELIABILITY

“ ”

*We had two Internet providers but were still going down almost daily. We could hardly use our cloud until we move to LightSpeed.*

**Vinnie Fisher**

Fully Accountable

## INTERNET SERVICE

LightSpeed's fiber network ride on the backbone of the Medina County Fiber Network. This give us access to 10+ carriers in Cleveland and Akron and gives us a highly-redundant loop in Medina County as well as up to Cleveland and over to Akron. We offer BGP mixed Internet services over fiber, or can directly connect you to one of the major Tier 1 providers in the area.
