Grants and sponsorships provided locally since 2011

We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Meta-supported projects are adding 677MW of new renewable energy to PacifiCorp's grid.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

Partnering with Oregon

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

New renewable energy investments

Meta worked with Pacific Power to meet our 100% renewable energy goals for the Prineville Data Center. This includes supporting two new renewable energy projects in Crook County, Oregon.

Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Prineville Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native and drought resistant vegetation and many use captured rainwater for irrigation.
- Captures and infiltrates rainwater on site.
- Utilizes water saving fixtures and technologies within data center facilities.

Water restoration

Our goal is to restore more water into local watersheds in Oregon than we consume by supporting water restoration and conservation projects led by local community partners including:

- **City of Prineville Aquifer Recharge** (Crooked River, OR).
- **Ingram Meadow Restoration** (Deschutes River, OR).
- **Crooked River Water Quality Partnership Coordination and Pilot** (Prineville, OR).
