

# Meta's Eagle Mountain Data Center

The Eagle Mountain Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

## \$1.5B+

Data center investment in Utah

## 2018

Broke ground on the Eagle Mountain Data Center

## 300+

Operational jobs supported once completed

## 1,200

Skilled trade workers on site at peak construction

## \$3.5M+

Direct funding to Utah County schools and nonprofits

## 180+

Grants and sponsorships provided locally since 2019

## We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Meta-supported projects are adding 894MW of new renewable energy in Utah.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

# Meta

# Partnering with Utah

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

## Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

## New renewable energy investments

Meta worked with Rocky Mountain Power to meet our 100% renewable energy goal for the Eagle Mountain Data Center. This includes supporting ten new renewable energy projects in Utah and creating an innovative renewable energy program that is available to other customers looking to meet their renewable energy goals.

## Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Eagle Mountain Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native and drought resistant vegetation.
- Captures and infiltrates rainwater on site.
- Uses water saving fixtures and technologies within data center facilities.
- Provides treated industrial wastewater to be reused for irrigation at Eagle Mountain parks.

## Water Restoration

Our goal is to restore more water into local watersheds in Utah than we consume by supporting water restoration and conservation projects led by local community partners, including:

- Eagle Mountain Water Reuse (Cedar Valley Watershed, UT)
- Flip Blitz (Central Utah Water Conservancy District, UT)
- Hobbie Creek Flow Restoration (Provo River, UT)
- Provo River Olmstead Power Station (Provo River, UT)

## We're proud to support projects led by:
