

# Meta's Henrico Data Center

The Henrico Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

**\$1B+**

Data center investment in Virginia

**2017**

Broke ground on the Henrico Data Center

**200+**

Operational jobs supported once completed

**1,500**

Skilled trade workers on site at peak construction

**\$3.26M+**

Direct funding to Henrico County area schools and nonprofits

**100+**

Grants and sponsorships provided locally since 2019

## We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Meta-supported projects are adding 540MW of new renewable energy in Virginia.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

# Partnering with Virginia

We are committed to supporting Henrico County through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

## Supporting local schools and nonprofits

We support local projects across Henrico County through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

## New renewable energy investments

Meta worked with Dominion Energy to meet our 100% renewable energy goals for the Henrico Data Center. This includes supporting seven new solar energy projects in Virginia and creating an innovative renewable energy program that is available to other customers also pursuing their renewable energy goals.

## Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Henrico Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native vegetation where possible to reduce irrigation demands.
- Captures and infiltrates rainwater on site.
- Uses water saving fixtures and technologies within data center facilities.

## We're proud to support projects led by:

Achievable Dream Academy  
Boys and Girls Clubs of Metro Richmond  
ChamberRVA  
CodeRVA High School  
CodeVA  
Commonwealth Connect  
Communities in Schools of Richmond  
Community Foundation for a Greater Richmond  
Computer Science Teachers Association  
Equality Virginia  
Excel to Excellence  
Friends of Henrico County Public Libraries  
Greater Richmond Fit4Kids  
Girls for a Change  
Greater Richmond Partnership  
Greater Richmond Technology Council (RVAtch)  
Henrico County Public Schools  
Henrico Education Foundation  
Henrico Police Athletic League STEM Club  
Henrico Too Smart to Start  
Junior Achievement of Central Virginia  
Lewis Ginter Botanical Garden  
Lighthouse Labs  
Love of Learning

Northern Virginia Technology Council  
Scholars Latino Initiative  
Science Museum of Virginia  
StartUp Virginia  
Virginia Chamber of Commerce  
Virginia Council on Economic Education  
Virginia Hispanic Chamber of Commerce  
Virginia PRIDE

## Community Spotlight

Since 2019, the Henrico Data Center has supported organizations and projects that meet community needs, including:

- Connecting students to their classrooms during COVID by providing 1:1 technology in partnership with the Henrico Education Foundation.
- Investing in a sound studio, digital media center and art lab at the Boys and Girls East End Teen and Community Center to help students discover new interests and explore future career pathways.
- Launching of a new Center for Environmental Science and Sustainability at Varina High School with Henrico County Public Schools to provide access for students to use equipment like a solar powered greenhouse, mobile sample processing lab, and air quality stations to investigate biology, chemistry, and physics through environmental principles.
