

Meta's Huntsville Data Center

The Huntsville Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

\$1.5B+

Data center investment in Alabama

2018

Broke ground on the Huntsville Data Center

300+

Operational jobs supported once completed

1,200

Skilled trade workers on site at peak construction

\$3.64M+

Direct funding to Madison County area schools and nonprofits

65+

Grants and sponsorships provided locally since 2019

We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Meta's supported project is adding 227MW of new renewable energy in Alabama.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

Meta

Partnering with Alabama

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits, and community projects.

Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

New renewable energy investments

Meta worked with Tennessee Valley Authority to meet our 100% renewable energy goals for the Huntsville Data Center, including creating an innovative renewable energy program that is available to other customers looking to meet their renewable energy goals and supporting a new solar project in Alabama.

Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Huntsville Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native and drought resistant vegetation.
- Captures onsite stormwater for reuse in dust suppression activities, and utilizes waterless dust suppression when conditions permit.
- Captures and infiltrates rainwater on site.
- Incorporates water saving fixtures and technologies within data center facilities.

We're proud to support projects led by:

- 100 Black Men of Greater Huntsville
- Alabama School of Cyber Technology & Engineering
- AUM Foundation
- Black Data Processing Association
- Boys & Girls Club of North Alabama
- Community Foundation of Greater Huntsville
- Cook Museum of Natural Sciences
- Drake State Community & Technical College
- Fantasy Playhouse Children's Theater
- Girls Inc. of Huntsville
- Huntsville City Schools
- Huntsville Schools Foundation
- Huntsville Space & Rocket Center
- Madison City Schools
- Madison County Schools
- Neighborhood Concepts
- Northwood Community Outreach
- Raise Your Hand - The Schools Foundation
- The Cap & Gown Project
- The Livin' Room
- Village of Promise
