

Meta's Sarpy Data Center

The Sarpy Data Center is part of Meta's global infrastructure that brings our technologies and services to life.

\$1.5B+

Data center investment in Nebraska

2017

Broke ground on the Sarpy Data Center

300+

Operational jobs supported once completed

1,300

Skilled trade workers on site at peak construction

\$3.48M+

Direct funding to Sarpy County area schools and nonprofits

160+

Grants and sponsorships provided locally since 2020

We prioritize sustainability

Meta will be water positive in 2030, where we restore more water than we consume.

Meta's supported project is adding 318 MW of new renewable energy in Nebraska.

Our global operations, including our data centers and offices, are supported by 100% renewable energy and have reached net zero emissions.

Meta's global fleet of data centers support our technologies that empower more than 3 billion people around the world to share ideas, offer support and make a difference.

Meta

Partnering with Nebraska

We are committed to supporting the community through hiring people to build and operate our data center, volunteering and supporting local schools, nonprofits and community projects.

Supporting local schools and nonprofits

One way we support the community is through our annual Data Center Community Action Grants program and other direct funding for projects that put the power of technology to use for community benefit, connect people online or off and improve STEM education.

New renewable energy investments

Meta worked with Omaha Public Power District to meet our energy goals for the Sarpy Data Center, including creating a new service option, Rate 261M, that enables us to support the Sarpy Data Center with 100% renewable energy from new, Meta-supported wind and solar projects.

Minimizing water use

We are proud to build some of the most sustainable data centers in the world and prioritize onsite water efficiency. The Sarpy Data Center:

- Uses cooling technology that is significantly more efficient than the industry standard.
- Reuses water numerous times before discharging it as wastewater.
- Is landscaped with native and drought resistant vegetation and many use captured rainwater for irrigation.
- Captures and infiltrates rainwater on site.
- Incorporates water saving fixtures and technologies within data center facilities.

We're proud to support projects led by:

Arbor Day Foundation
Bellevue Public Schools
Fontenelle Forest
Gifford Farm Education Center
Girl Scouts Spirit of Nebraska
Gretna Public Schools
La Vista Community Foundation
Lift Up Sarpy
