# UNITED STATES Phoenix PH1 Data Center

In one of the most dynamic data center growth markets in the country, **PH1 is the first of seven data centers** on our 240MW campus. PH1 is just 30 minutes from Phoenix Sky Harbor International Airport, and is built to LEED-certified specifications for maximum energy conservation and minimum water usage.

NTI

## Data center space

- 126,000 sq. ft. data floor space
- Six 6MW vaults
- Two-story building
- Class A office space available

#### Power

- Total critical IT load: 36MW
- Four primary 34.5kV utility feeds, plus one alternate feed
- N+1 redundancy for each vault
- Four (4) x 2MW UPS modules for every 6MW capacity
- Diverse power distribution to the data vault (A and B feeds)
- · 24-hour fuel storage capacity
- Power densities available up to 22kW per rack
- · Renewable energy options available

## Cooling

- Air-cooled chillers with airside economizers
- Fan coil wall cooling design with hot aisle containment and N+1 redundancy in the vault
- Dedicated modular chiller plant designed with a closed loop water cooling system for additional efficiency

#### Fire protection

- Next generation safety management by ONYXWorks for centralized control and monitoring of the fire alarm system
- Dual interlocked nitrogen filled preaction dry pipe fire suppression system
- Aspiration Smoke Detection (ASD) system enabling fast detection, response and mitigation

#### Security

- 24x7x365 Security and Operations team
- Fenced campus with centralized, electronic access control system
- 100+ real-time security feeds using pattern-based technology
- Multi-factor authentication throughout the facility
- Secure managed delivery and loading area 24x7x365

#### Connectivity

- Carrier-neutal
- Three diverse fiber entry points
- Two Meet-Me-Rooms
- Network dense with access to many global and regional carriers and ISPs offering dark and lit services
- Access to multiple leading public, private, and hybrid cloud providers

data center.

free Wi-Fi.

upwards of 480MVA.

Sustainability: PH1, along with all other data centers on the Phoenix campus, will be built to LEED-certified specifications for Core and Shell. We are designing

and building the mechanical, electrical, plumbing, and fie protection systems

for maximum energy conservation and minimum water usage. PH1 also utilizes

a closed loop water cooling system for additional water usage efficiency at the

Substation: PH1 will utilize the NTT-owned on-site substation that deliers

Client amenities: PH1 offers several client amenities including conference

rooms, hoteling stations, break room, crash carts, rack and server lifts, and

#### Additional data center services

- · Remote hands and eyes
- · Fit-out and deployment
- · Class A office space
- Dedicated long-term strage

#### **Certifications and compliance**

Compliance

- SOC1 and SOC2 Type II
- · ISO 27001
- ISO 50001 Energy Management
- PCI DSS
- NIST 800-53 High
- HIPAA

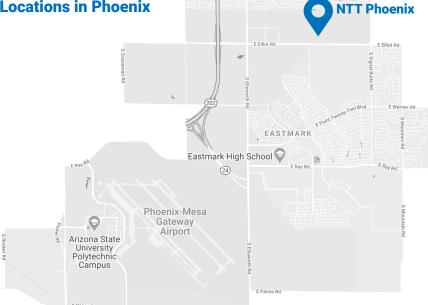

Sustainability

- · Designed to LEED Gold Standards
- EPA ENERGY STAR

#### **Data center products**

- Cabinets
- Customizable cages
- · Private suites
- Dedicated vaults .
- . Build to suit
