

MIGRATION PLANNING & IMPLEMENTATION

OUR TEAM OF CERTIFIED ENGINEERS WORKS IN TANDEM WITH YOU TO ENSURE YOUR MIGRATION AND IMPLEMENTATION RUNS AS SMOOTHLY AS POSSIBLE AND IS BOTH STRESS-FREE AND ISSUE-FREE.

Whether upgrading systems, moving to the cloud, or consolidating data, a migration is likely in your future. It's a massive undertaking and OFFSITE knows the significance of your data demands that the migration is implemented properly. Without a comprehensive strategy, data migration can cause more issues than solutions, causing you to be over budget and behind on timelines.

OFFSITE is here to assist our clients throughout this demanding process. Our team of engineers works in tandem with clients, creating a co-managed solution. OFFSITE is here for you – from planning to implementation, and every step in between.

COMPREHENSIVE SYSTEM MIGRATION:

- » Hardware audits and documentation
- » Certified transportation of critical systems
- » Hardware rack and stack
- » Data pool migration
- » Network connectivity and testing
- » Equipment receiving and deployment
