DATA CENTER

The experience, expertise and proven facility to make sure that your critical data is always available.

Why Choose Our Data Center?

RACK59 Data Center offers 99.999% reliability, best-in-class design, operations and efficiency on one of Oklahoma's fastest growing technology campuses. Designed as a mission critical facility, RACK59 provides 7 layered security, expansive and redundant power, abundant flexible-use space and unparalleled fiber connectivity for today's data driven enterprises.

Power, Space and Bandwidth...it's what we do best!

With 40+MW of available power, RACK59 has the most robust power of any data center in Oklahoma and rivals enterprise data centers like Google, Facebook and Microsoft.

RACK59 has room to grow. With 15,000 SqFt of raised floor and an additional 250K+ of available private data center space, RACK59 can offer customizable options for any size enterprise.

With 20+ carriers on-net in our Carrier Hotel, RACK59's offers the most robust and diverse connectivity of any data center in the state of Oklahoma.
