

Company Overview

We're Central India's first data center that strives to solve internet infrastructure problems of organizations of all sizes: small, medium and big globally by providing premium state-of-the-art datacenter solutions. Headquartered in Indore, India, we enable online businesses for their software and applications and websites in managing their data more effectively. Founded in 2013 by Narendra Sen, we are a fast-growing startup with a clear cut vision of making India self-sufficient in data storage and hosting.

We're also a Consultant to India's first Data Center Park project (part of Digital India campaign) by the Government of Madhya Pradesh.
