### SF AMS1

The SF AMS1 data center is home to a number of global enterprises. The facility is highly connected with over 100,000 square feet of available shell space ideal for cloud, low latency & edge environments.

Positioned in a prime location inside the A10 and less than 4 km from the city center, with access to a dozen carriers and multiple diverse fiber entry points.

Our InCommand Services offer a range of fully managed Facility and IT infrastructure management solutions, as well as real-time access to data center analytics.
