Seattle Data Center

The City's Largest Locally Owned and Operated Colcation Data Center

SEA1 - 12201 Tukwila Intl Blvd, Seattle, WA 98168

The Wowrack Seattle Data Center is your ideal colocation provider!

Our flagship data center is located on the southern side of one of America's leading tech hubs Seattle, WA. Locally owned and operated, our data center is the largest in the PNW tech hub. Built above the flood line to withstand any flood and fortified to endure any storm, this data center is designed to withstand any natural disaster. Furthermore, we are SOC 2 Type 2 PCI/HIPPA compliant and audited annually to meet industry standards for colocation services. Our data center is perfectly suited for customers seeking to set up a network for their small business to CEO's looking to expand their fortune 500 company. Ultimately, Wowrack is here to take care of your IT needs because when you partner with us, we become an extension of your business. Let's grow together and thrive!

SOCII Compliance

Wowrack's flagship data center is SOCII Type 2 PCI/HIPPA Mapping audited annually. To ensure maximum uptime, all components are N+1 redundant. Colocation and managed to-host solutions are backed by multiple power generators that are tested weekly and equipped with uninterrupted power supplies to ensure that you never go offline.

Top-notch Customer

We pride ourselves on having top-notch customer service. Our staff roster is filled with industry veteran techs and specialists to assist you with your needs and take action with any issue that might occur. Driven by passion, our on-site make's it their mission to ensure that you are taken care of 24x7x365.

Flexibility and Safety

Our data center offers 18,000 sqft of premium data center space for your growing needs. Built with safety in mind, our data center is located above the flood line in case of a natural disaster. The facility is carrier-neutral, hosting several different carriers, and has a proprietary high-performance network that ensures fast and reliable connections globally.

And Many More!

We Are Always Here For You

Our global network of operations as well as our Smart Hands & Eyes services offer 24x7x365 support to you, ensuring the smooth operation of your critical infrastructure through continuous monitoring, rerouting of data, and providing on-demand assistance from elite team of IT professionals.

Flexible And Scalable

In colocation terms, scalability is having the ability to add power, cooling and space as required and on demand, including advanced connectivity options. Our colocation facilities provide scalable solutions, ensuring that your organization can accommodate growth in its infrastructure needs by allowing it to upgrade in place. This is achieved through sufficient density capabilities.

Compliant And Secure

Our security measures go above and beyond industry standards with security certifications and additional provisions to meet customers' compliance requirements, including privacy regulations like the General Data Protection Regulation (GDPR).

Wowrack offers you more than just a colocation data center. From security to cloud infrastructure managament, Wowrack has you covered 24x7x365

About

Wowrack (Wow Technologies, Inc.) is a multinational IT company that provides various cloud infrastructure, backup and disaster recovery, colocation, and cybersecurity solutions.

Ever since 2001, we have always been striving to be more than a service provider—a partner. Dollars and cents might be an integral part of running a business, but we value relationships with our customers over anything. In delivering our products and services to cater your needs, there is one thing that we always keep in mind: we must deliver what your business actually needs. Not too much, not too little. Just the right amount.
